

OpenFantasia

Personalized, multilingual fairy tales that transform educational content and emotional experiences into simple, engaging learning opportunities.

THE EDUCATIONAL CONTEXT

TODAY, TEACHERS AND EDUCATORS FACE INCREASINGLY COMPLEX CHALLENGES .

- How can abstract concepts be **explained in a simple and engaging way?**
- How can **educators address emotions**, relationships and cultural diversity?
- How can **we engage classes** with different learning styles, paces and needs?
- How can digital technology be introduced safely and responsibly?
- How can we **reduce educational inequalities** in the early years of schooling?

THE PROBLEM

WHAT'S ON THE MARKET

Traditional tools and digital resources are not always suitable:

- **Content that is too generic** or cannot be customized
- **Apps** that are **too complex** for children aged 3–10
- **Limited integration** between storytelling, education and inclusion
- **Concerns about privacy**, data security and the use of AI

Once upon a time,

THE ENCHANTED WORLD OF FAIRY
TALES CRAFTED BY

Artificial Intelligence

Bring your little ones' dreams to life with Unicorn
Fairy Tales.

Turn every night into a new adventure

TRANSFORMING CHILDREN'S STORYTELLING WITH AI

One minute to create a
memory that lasts forever

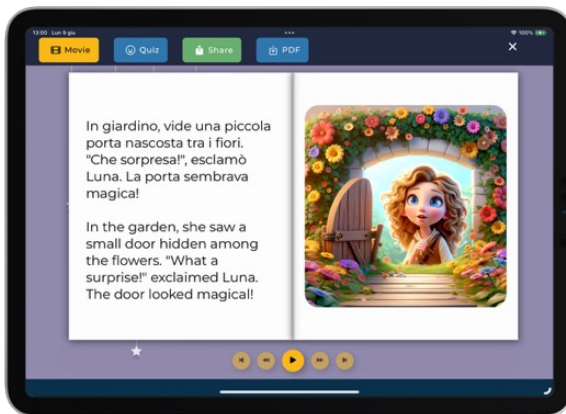

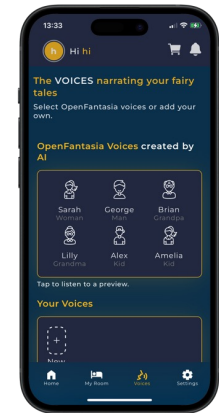

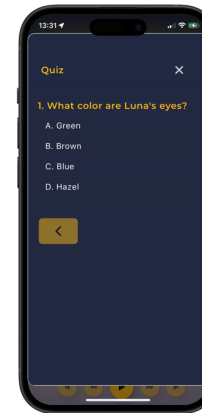

WHY OPENFANTASIA

Easy, intuitive,
fast

It adapts to
your child's
age

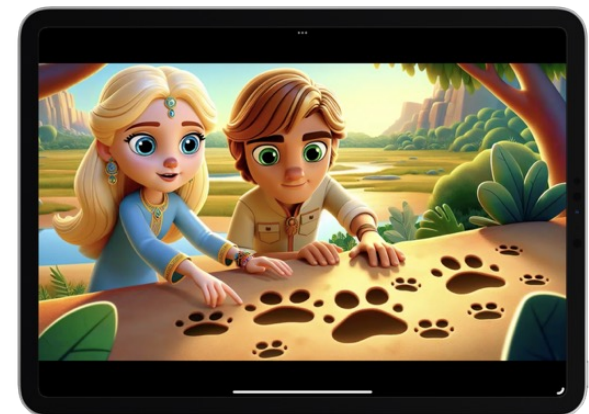

Stories that
help children
grow

Multilingual
videos and
audiobooks

Narrated by
you or by AI

Quizzes and
learning
games

1 MINUTE IS WORTH MORE THAN 1000 WORDS

- Discover OpenFantasia in action in only 1 minute: [click here](#)
- This demonstration presents the general version, which can be customized to meet your school's needs.

WHAT MAKES OPENFANTASIA DIFFERENT ?

Simple, visual and empathetic language, suitable even for the youngest children

Full customization: class, context, age group, narrative style and educational topics

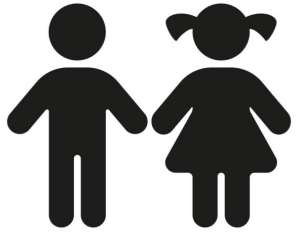

Stories that clearly explain emotions and educational content

Ease of use: teachers can create a story in minutes and children can engage with it immediately

Full GDPR compliance: no sensitive data, EU-based infrastructure and responsible AI

BENEFITS

For children

- **difficult concepts**
- **They recognize themselves in the characters** and participate more
- **They experience learning as play** and discovery
- **They improve attention** , listening and empathy
- **Provides natural support** for children with special educational needs and children from different linguistic backgrounds

For teachers and
schools

- Quick tool for creating **personalized content**
- **Supports educational projects**, student integration and inclusion
- Facilitates work on emotions and **coexistence in the classroom**
- **Introduces digital technology** in a safe and guided way
- Useful for communicating with families, educators and psychologists

WHAT CAN BE CREATED?

Examples of educational applications:

Fairy tales about **classroom rules** and **positive coexistence**

Stories about emotions : jealousy, anger, fear, courage

Stories about nature, animals, space, the environment, and sustainability

Personalized fairy tales set in your own school or city

Simple explanations of **STEM topics** (numbers, logic, science)

Stories that welcome new students and celebrate different cultures and languages

SAFETY FIRST

A secure, compliant, and transparent digital environment.

- **No** sensitive or health **data is collected**
- The teacher has full control over content, access and use.
- AI models designed in accordance with GDPR principles, including data minimization and purpose limitation.
- No tracking, profiling or identification of children.
- No advertising and no sharing or sale of data to third parties.
